

LogBark

Barking diary · Illustrative example — September at home

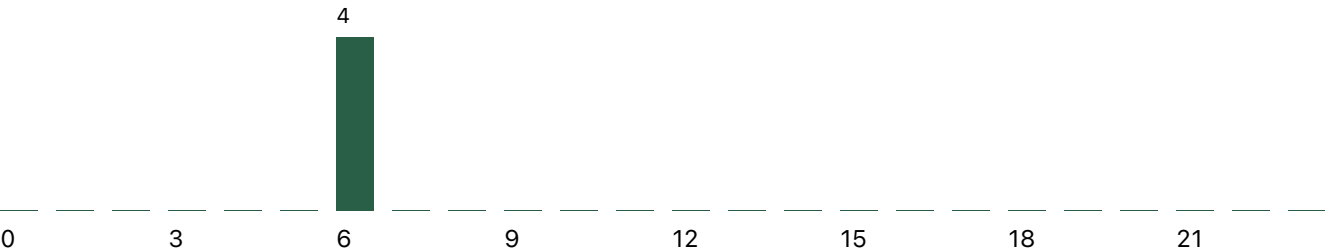

Period: 2026-09-13T00:00:00+10:00 to 2026-09-14T00:00:00+10:00 (end exclusive).

Report time zone: Australia/Sydney. Generated: 2026-09-13T16:53:12+10:00.

4 included events · 1 excluded · 4 marked relevant · 60 minutes of confirmed listening

Detected events are not individual bark counts. Gaps between events are not continuous barking. Classification can miss or misidentify sounds and cannot identify a particular dog. Outside the listed listening periods, coverage is unknown. Check the recipient's diary requirements.

Detected activity by local hour

Events per hour, summed across selected dates; excluded events omitted. This chart does not measure barking duration.

User observation · Australia/Sydney

Source (user supplied): Unknown; heard from bedroom with window closed.

Impact: Woke me up while sleeping.

Pauses: Several quiet pauses; not continuous barking.

Note: All records in this report are fictional examples, not a real complaint.
